CV / Resume

Professional Summary

GIS Specialist and Data Analyst with hands-on experience in urban planning and building-regulation monitoring for Monufia Governorate. Proven track record building 11 Power BI dashboards spanning civic infrastructure, national development initiatives, and business intelligence — transforming large Access/Excel datasets into interactive, map-based, decision-ready tools. Detail-oriented, deadline-driven, and comfortable resolving technical challenges independently.

Experience

GIS & Data Analyst — Building Regulation Monitoring, Monufia Governorate

- Built and maintain a governorate-wide Power BI dashboard tracking 116,682 spatial building variables (2017–present): 87,087 licensed, 11,151 pending reconciliation (تمالّح), and 8,631 unlicensed violations, sourced from an Access database with 100K+ records across multiple date-snapshot tables
- Designed the full data pipeline: Power Query transformation, DAX measures (violation counts, removal-completion rate), time-trend analysis, and filtering by governing authority, affiliated entity, and district
- Resolved technical infrastructure issues (Office/Power BI bitness conflicts) to enable direct Access connectivity
- Managed data-architecture decisions for tracking status changes over time across multiple snapshots

Featured Projects — Government & Urban Planning Dashboards

Building Variables Tracking System — Executive Dashboard

A 5-page executive Power BI system (2025–2026) tracking 30,684 building variables across Monufia's centers — 11,385 pending legalization, 8,663 illegal, 10,227 other — with legalization-progress KPIs (5.2% completion toward target, 189 licenses issued, 5 lagging centers) and a full breakdown by reconciliation (تمالّح) stage and legal status.

Interactive Land-Use Classification Map

Interactive Power BI map classifying 4,399 land-use and demographic records across Monufia Governorate (59.5% residential, 6.4% commercial, plus administrative, service, and vacant-land categories), combined with a population-census layer showing per-city totals (e.g. 155,478 residents in Ashmoun), filterable by center/village (شياخة).

Azhari Institutes Dashboard

Maps 600 Azhari educational institutes across Monufia Governorate, breaking down by educational stage (kindergarten, primary, preparatory, secondary), morning/evening shifts, institute type (regular/model), and gender distribution (boys, girls, mixed) — with per-institute details on student/teacher counts, computer and science labs, and language of instruction.

Public Parking Facilities Dashboard

Interactive Power BI dashboard mapping 29 public parking locations across Monufia, with satellite-based geolocation, operational-status tracking, and dynamic filtering by center and facility.

Water Treatment Stations Dashboard

Covers 26 treatment stations, comparing design vs. actual capacity and mapping service-area coverage across the governorate.

Labor Force Offices Dashboard

Tracks 43 labor offices governorate-wide, monitoring operational status (97.7% active) and office-type distribution to support workforce planning.

Heritage & Archaeological Sites Dashboard

Maps 7 registered heritage buildings in Monufia with legal registration data and geographic distribution, supporting cultural-heritage preservation efforts.

“Hayah Karima” National Initiative Dashboard

Monitors 40 service and agricultural cluster projects under Egypt's national rural-development initiative, tracking delivery and operational status by sector and location.

Handicrafts & Workshops Distribution Dashboard

Analyzes 13 craft categories and 3,324 workers across licensed and unlicensed workshops, identifying informal-economy gaps for policy planning.

Featured Projects — Business Intelligence & Marketing Analytics

Real Estate Lead Conversion & Pipeline Efficiency Dashboard

Built a 4-page Power BI dashboard analyzing real estate lead conversion and sales-pipeline efficiency — identifying a conversion rate below industry benchmark, EGP 1.37M in annual lost commission, and wasted ad spend, with concrete recovery recommendations projecting a strong ROI on the proposed fix.

Marketing Campaign Performance Dashboard

Built a Power BI dashboard tracking marketing campaign performance across 6 campaigns — monitoring cost, clicks, impressions, CTR, and revenue on monthly and quarterly bases to support budget-allocation decisions.

Certifications & Education

- B.Sc. in Surveying Engineering — Benha University, Shoubra Faculty of Engineering (2013)
- Data Analysis & Business Intelligence Development — IBSRA (3-month program, 2026)
- Field Data Collection and Management Using ArcGIS — Esri Northeast Africa (2020)
- Migrating from ArcMap to ArcGIS Pro — Esri Northeast Africa (2020)
- Data Analysis / Excel / Power BI certificate series — EYouth Business
- Freelance Training Program — ITIDA Gigs & eYouth (3 months)
- Certificate of Appreciation, training course participation — Military Survey Authority (ENSDI), 2021
- 3D MAX Course (48 hrs) — Menoufia Engineers Syndicate, 2014
- Mastering AutoCAD 2014 For Engineers (60 hrs) — YAT Learning Solutions, 2014

Skills

- GIS: QGIS, ArcGIS, Google Earth
- Data Analysis: Excel, Power BI, Access, Power Query, DAX
- Reporting & Presentations: Word, PowerPoint
- File Management: Google Drive, Google Sheets
- Additional: attention to detail, time management, remote work experience
